

A man and a woman are embracing in a modern living room. The man is wearing a maroon t-shirt and dark jeans, and the woman is wearing a yellow and white patterned dress. They are standing in front of a large window with green plants. Two large, dark brown JBL speakers are visible on either side of the couple. In the foreground, there is a white coffee table with a small red and yellow object on it.

***THE BRAND OF LIVE MUSIC.***

## FROM THE STAGE TO THE HOME

If you haven't heard the JBL® sound, you haven't been listening. JBL loudspeakers have been the overwhelming choice of audio professionals for more than 60 years, powering premiere

concert venues, movie theatres and recording studios around the world. But the JBL sound is also available in exceptional entertainment systems engineered for the most important venue of all — your home.

I know it's only rock 'n' roll,  
but I like it.

THE ROLLING STONES

## STUDIO MONITOR SERIES

JBL studio monitors have long set the standard for accuracy in the reproduction of recorded sound, playing loud and long with unequalled power and dynamic range. Now we're engineering state-of-the-art systems with the classic JBL look for home use.

With massive woofer cones, larger voice coils, higher power ratings and wider sensitivity ranges than their competitive counterparts, these monitors exceed the expectations of critical listeners and music professionals alike, providing listening experiences of such richness and subtlety, they cannot be compared to anything but a live performance.

***REFERENCE-QUALITY SOUND.***

There is no strong  
performance without a little  
fanaticism in the performer.

**RALPH WALDO EMERSON**

## TI SERIES TL260

Commissioned to celebrate our 60th anniversary, the JBL TL260 is a celebration of music itself.

Beautifully crafted in mirror-image pairs and hand-finished in black piano lacquer, these limited-edition five-way systems have been engineered to showcase our most advanced audio technologies — and create a

listening experience like no other. With PolyPlas™ woofer cones, rubber surrounds, cast-aluminium baskets, HeatScape™ motor structures, oversized-Kapton® voice coils, EOS waveguides and pure-titanium and Mylar® tweeter domes, the TL260 will effortlessly reproduce every nuance of your favourite music and movies with brilliant clarity and effortless power.

***A LIMITED-EDITION TOUR DE FORCE.***

The most difficult part  
of attaining perfection is  
finding something to do  
for an encore.

**UNKNOWN**

# CONCERT-HALL TECHNOLOGIES FOR SOMEWHAT SMALLER AUDIENCES.

## LS SERIES

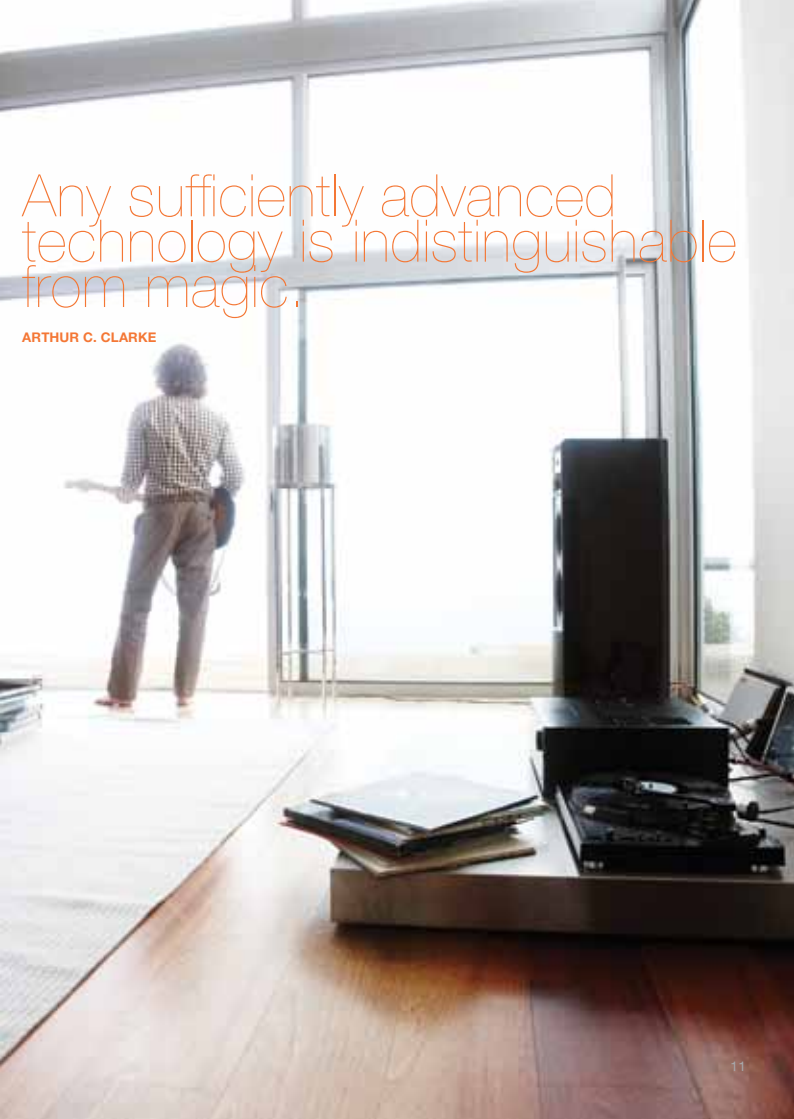

High-performance LS Series loudspeakers share a design philosophy and a Bi-Radial®-horn/compression-driver configuration with the widely acclaimed JBL K2® and Project Array™ speakers as well as with the Everest DD66000, the most uncannily lifelike musical instrument JBL engineering has ever produced. Now you can

experience realistic, full-spectrum dynamics at home, with brilliantly clean highs, tight, lifelike bass and precise dimensional accuracy at any listening level. Music and movies are made to be enjoyed, and LS Series speakers are engineered to ensure that you'll enjoy them to their fullest.

Any sufficiently advanced technology is indistinguishable from magic.

ARTHUR C. CLARKE

*HIGH-DEFINITION AUDIO.*

Art is the only way to run  
away without leaving home.

TWYLA THARP

### ES SERIES

With a choice of bookshelf, wall-mounted and floorstanding loudspeakers, and bring-down-the-house-powered subwoofers, the versatile ES Series features stiff woofers and fast HF and UHF drivers to deliver realistic, full-spectrum sound for both multichannel home theatres and traditional music systems. ES speakers deliver the higher highs, tighter bass and greater accuracy that today's digital sources demand, with handsome, slim-profile enclosures in a selection of black or cherry finishes.

## COMING IN LOUD AND CLEAR.

### STUDIO 5 SERIES

You deserve the best. Setting the standard for realistic, full-spectrum studio sound, the sophisticated family of JBL loudspeakers creates a dramatic, elegant and affordable design statement in any listening space. High-frequency compression drivers and award-winning voice-matched technology replicate a cinematic movie theatre and let you experience music so faithful to the original recording that your

home will become your very own concert venue.

With innovations minimising compression and heat, the high-performance range of loudspeakers, consisting of two floorstanding models, one bookshelf, one centre and one subwoofer, play loud and long, producing powerful sound with vibrancy, accuracy and detail – music and movies exactly as recorded.

Music can change the world  
because it can change people.

BONO

***STUDIO PERFORMANCE AT HOME.***

Only those who will risk  
going too far can possibly  
find out how far one can go.

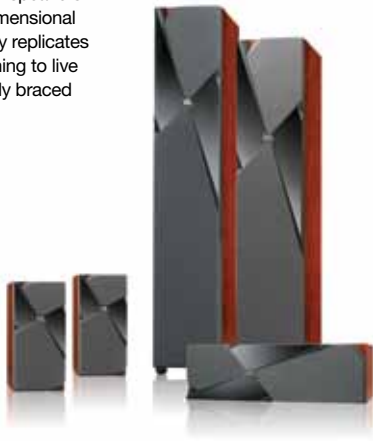

T.S. ELIOT

### STUDIO 1 SERIES

JBL Studio 1 Series loudspeakers are powerful, accurate and styled to make a dramatic design statement in any listening environment.

With technologies that minimise compression and heat, and produce more uniform on- and off-axis response, Studio 1 speakers create a vivid, three-dimensional soundstage that closely replicates the experience of listening to live sound. The rigid, heavily braced

enclosures include rear-facing bass ports that take advantage of nearby walls to extend and enhance low-frequency response. The enclosures themselves, exquisitely finished in silver-tinted black or cherry vinyl, incorporate the distinctive JBL Weave design for a dynamic, one-of-a-kind look.

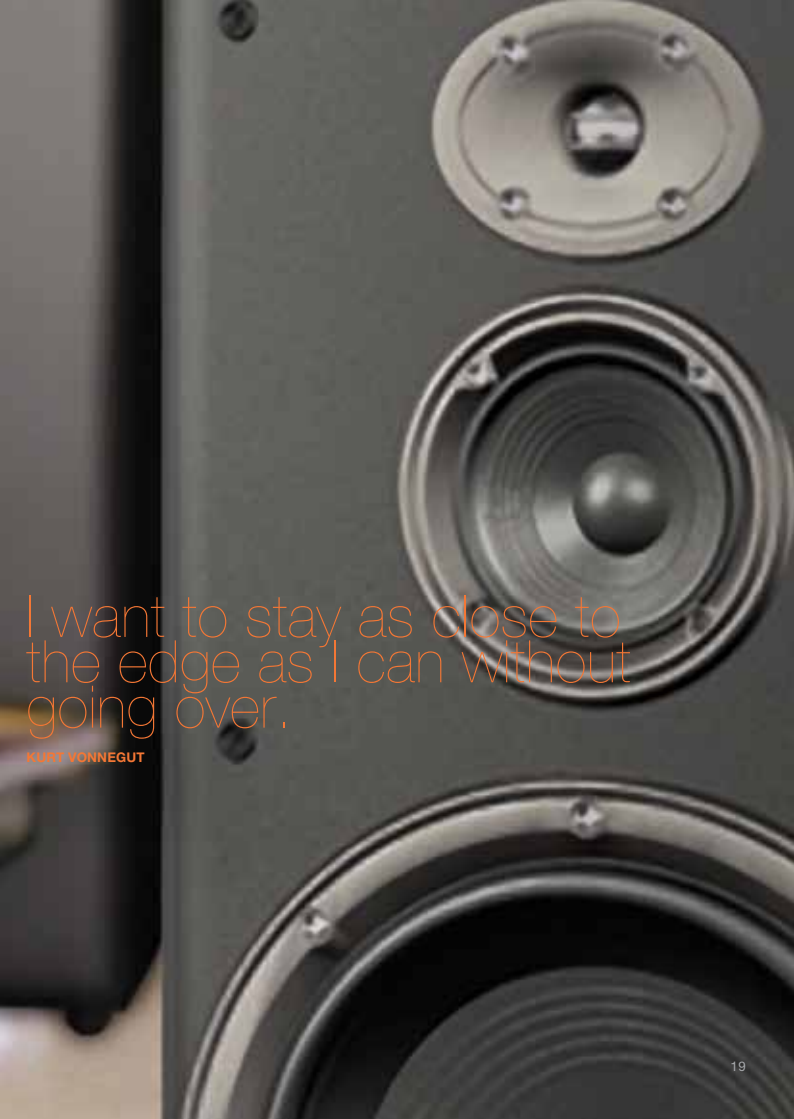

## **NORTHRIDGE E SERIES**

PolyPlas woofer cones. Titanium-laminated tweeter domes. EOS waveguides. The Northridge E Series draws on performance-proven JBL professional technologies, bringing the sound of concert stages, recording studios and movie theatres to living rooms, dens, bedrooms and offices. With a selection of two- and three-way bookshelf and floorstanding systems in a choice of finishes, you can assemble a Northridge E system that's ideal for your budget and your décor. If music and movies are an important part of your life, Northridge E should be part of your home.

***PROFESSIONAL PERFORMANCE.***

I want to stay as close to  
the edge as I can without  
going over.

KURT VONNEGUT

## *PURE HOLLYWOOD EXCITEMENT FOR ANY LISTENING SPACE.*

### **JBL CINEMA SOUND SYSTEMS**

The JBL brand has been the recognised authority in movie sound for more than 60 years, responsible for well over half of all theatre installations worldwide. JBL Cinema Sound speakers put that experience to work in high-style, high-impact systems sized to fit comfortably in almost any environment. Dual-midrange centre and satellite speakers

surround you with distinct dialogue and crisp, accurate music and effects. A down-firing powered subwoofer adds the deep, floor-rumbling bass that today's most exciting movies demand. There are larger, more cumbersome home theatre systems out there. But for pure, unalloyed movie magic, the JBL Cinema Sound Series yields to none of them.

Every time I go to a movie,  
it's magic, no matter  
what the movie's about.

STEVEN SPIELBERG

## *DRAMATIC THEATRE SOUND FROM JUST TWO COMPONENTS.*

### **CINEMA SB300**

Many home theatre installations require five loudspeakers, a subwoofer and miles of speaker wire. The Cinema SB300 TV soundbar greatly simplifies the equation. Just connect the amplified soundbar directly to your television, DVD player or game console, and plug the wireless powered subwoofer into any convenient power

outlet. You'll enjoy rich, full-spectrum 2.1-channel output that dramatically improves the sound of any TV monitor, or you can use Dolby® Virtual Speaker technology to create a realistic 360-degree soundstage electronically. Either way, you'll enjoy true JBL performance from any audio source without a speaker wire in sight.

Everything should be made  
as simple as possible, but  
not simpler.

ALBERT EINSTEIN

**COMPACT, RUGGED, INGENUOUS.**

### **JBL CONTROL NOW™**

Talk about flexibility – JBL Control NOW™ loudspeakers will literally bend over backwards to deliver music anywhere you need it to be. Mounted individually, or in circular or semi-circular arrays of up to four, there's virtually no place JBL Control Now speakers can't go – and few spaces they can't fill with high-output JBL sound. Use them in traditional stereo setups, home theatres or whole-house music and office public-address systems. They deliver evenly distributed sound with minimal distortion at any volume level in any listening environment.

### **CONTROL® ONE / CONTROL 2.4G**

Compact, two-way designs in the JBL professional tradition, Control Series monitors take studio performance to places it's never been before. They come in a choice of wired and wireless models, indoor and outdoor speakers. Versatile and rugged, these are true monitors, engineered for outstanding accuracy and dynamic range.

The essence of pleasure  
is spontaneity.

GERMAINE GREER

## HTi™ SERIES

Forget background music — HTi Series in-wall and in-ceiling loudspeakers are designed for serious listening. With swivel-mounted tweeters that can be aimed directly at your room's primary listening area, rubber surrounds that dramatically reduce resonances between the speakers and the wall, and high power ratings, HTi Series speakers deliver the kind of performance you'd expect only of stand-alone systems. Easily installed in both new and existing construction, they're an ideal choice for whole-house music or home-theatre systems.

***FILL YOUR HOUSE WITH SOUND,  
NOT SPEAKERS.***

I am hitting my head  
against the walls, but the  
walls are giving way.

**GUSTAV MAHLER**
