HORN/COMPRESSION
DRIVER MOUNTING
SYSTEMS

The 2500 Series Professional Mounting Brackets are designed to facilitate easy installation and quick adjustability in a variety of applications. Each model in the 2500 Series is manufactured of rugged 1/8" steel (1/16" for the 2507) and finished in matte black.

2506A Fixed-Position Mounting Bracket. The 2506A is designed for use with the 2360 Series horns in JBL theater systems, as well as in other applications requiring horn mounting on a flat surface.

2507 Three-Way Adjustable Position Mounting Bracket. The 2507 is a two-piece system designed for use with the 2344 Bi-Radial™ and 2370A Flat-Front Bi-Radial Horns in applications requiring horn mounting to a flat surface. Multiple slots in both the outer and inner frames of the bracket allow horn aiming and rotation in three planes.

2508A Fixed-Position Mounting Bracket. The 2508A is designed for use with the 2344A, the 2370A, and the 2380 Series Bi Radial horns in applications requiring horn mounting on a flat surface. Multiple mounting holes permit horn rotation about the throat axis in 15° increments.

2509 Three-Way Adjustable-Position Mounting Bracket. The 2509 is a two-piece system designed for use with the 2360 and 2380 Series Bi-Radial Horns in applications requiring horn mounting to a flat surface. Multiple slots in both the outer and inner frames of the bracket allow horn aiming and rotation in three planes.

All JBL Professional Series Mounting Brackets are supplied with SAE Grade 5 hardware for driver attachment and bracket installation. The Model 2507 and Model 2509 are additionally supplied with set screws for locking the elevation setting.
