

UREI INSTALLATIONS

UREI TIME ALIGN® MONITORS

Since their introduction in the late seventies, UREI Time Align® monitors have provided serious recording studio owners and engineers with a coaxial monitor combining time corrected response over the entire audio band with the capability of high acoustical output. The original Time Align monitors were modified Altec 604 loudspeakers with a dividing network designed by Ed Long Associates. The network corrected the inherent time offset between the high and low frequency elements, thus enabling the combined elements to act nearly as one. The result was a virtual point source of sound capable of repro-

ducing square waves, a difficult job for any loudspeaker.

The idea for the system had come from veteran recording engineer Bill Putnam, the Chief Executive Officer of UREI. In time, Putnam sold UREI to JBL, and the monitor took on new life as UREI engineers, working with JBL transducer engineering, brought the benefits of 100mm (4") voice coils and titanium diaphragms to the basic two-way transducer. The current Time Align models reflect these and other improvements and are able to handle more power than their predecessors with audibly cleaner response.

“We purchased UREI 813C monitors for our film and video post production suite as part of the recent upgrade to a left, center, right monitor system. The reason for the purchase was based primarily on years of quality music product from our studios as a result of using the 813A's, still in use in two rooms.”

Ron Lagerlof,
Studio Manager
Hitsville Studios

Hitsville Studios, Motown Records, Hollywood, CA

Urei

We are pleased to list the following 24-track studios which use large format UREI Time Align monitors. USA listings are taken from recent issues of Mix Magazine through early 1988. United Kingdom listings are from the APRS Studio Guide. Japan listings are from Pro Sound Magazine. We apologize in advance for any errors or omissions.

► **Southern California Studios:**

Airdrome Recording, Los Angeles, CA
 Capitol Records Studios, Hollywood, CA
 Evergreen Recording Studios, Studio City, CA
 Fidelity Studios, Inc., Studio City, CA
 Golden Goose Productions, Costa Mesa, CA
 Goldmine Recording Studio, Ventura, CA
 Hitsville Recording Studios, West Hollywood, CA
 Indian Hill Recording, Claremont, CA
 Metropolis Recorders Inc., Studio City, CA
 Preferred Sound, Woodland Hills, CA
 Recording Services Company, Burbank, CA
 Score One Recording, Inc., North Hollywood, CA
 7th Street Sound, Los Angeles, CA
 Sound Design, Santa Barbara, CA
 George Tobin, North Hollywood, CA
 Total Access Recording, Redondo Beach, CA

► **Northeast Studios:**

Atlantic Recording Studios, New York, NY
 Automated Sound Studios, New York, NY
 Bearsville Studios, Bearsville, NY
 Bit Mo Recording, Wheaton, MD
 Blackbeard Studios, Lincoln, RI
 Blue Jay Recording Studio, Inc., Carlisle, MA
 Celestial Sounds, New York, NY
 Clinton Recording Studios, Inc., New York, NY
 Cove City Sound Studios, Glen Cove, NY
 Downtown Recorders, Boston, MA
 Dreamland Recording Studios, Bearsville, NY
 East Side Sound Co. Inc., New York, NY
 Grog Kill Studio, Woodstock-Willow, NY
 Hillside Sound Studio, Englewood, NJ
 Hit and Run Studios, Rockville, MD
 House of Music, Inc., West Orange, NJ
 "If Walls Could Talk" Studios, Caldwell, NJ
 Intergalactic Music Inc., New York, NY
 Kajem Studios Ltd. USA, Gladwyne, PA

 Sync Sound, Inc., New York, NY
 Tiki Recording Studios, Inc., Glen Cove, NY
 Unique Recording Studio, New York, NY
 White Crow Audio, Burlington, VT

“Capitol Records selected the UREI 813 monitoring system for Studio C due to the Time Aligned components and inherent frequency response of the system. This gives us good imaging and great results in mastering.”

Jeff Minnich,
 Chief Engineer
 Capitol Records

Capitol Records, Hollywood, CA

University of Southern California, School of Cinema-Television, Spielberg Scoring Stage, Los Angeles, CA

“ The School of Cinema-Television at the University of Southern California chose the UREI Model 813 for its Spielberg Scoring Stage because its widespread use in recording studios makes it an industry standard. Furthermore, its ruggedness meets the requirements of a teaching institution since students do make mistakes; the UREI 813 is very forgiving.”

Herbert Farmer
