

MOTOROLA Models MoPar 613 used in Plymouth P26, P27, and MoPar 614 used in Dodge D55, D56.

NOTES:
Capacitors - Distal values in μ F all others in PPF
Voltage - Measured from grid potential to chassis
with a VTVM. No signal input. 400K
Input voltage at switch 0.9V
Tuning range - 447 to 1610 Kc
17 810 Kc

ALIGNMENT DATA
